EMPLOYMENT HISTORY

Application developer at Institutional shareholder services(ISS), Mumbai

July 2022 — May 2024

- Started working on vote disclose service(VDS) a part of proxy exchange application of institutional Shareholder services, where I worked on Springboot, Angular , SQL.
- Analyzed system flows, data usage, and investigated problem areas.
- Successfully implemented Google Charts within the Angular framework to create interactive and visually appealing charts and graphs.
- Expertise in Angular controllers, directives, factory and service resources, routings and events.
- Implemented RESTFUL APIs using JAVA within the Spring Boot framework to facilitate seamless communication between frontend and backend systems.
- Led the migration of a website from PHP to Angular
- Utilized Java alongside Angular to develop backend APIs and services, enabling smooth data retrieval and manipulation for the new Angular frontend.
- Utilized Angular, HTML5, CSS to develop a responsive and highly interactive front-end.
- Optimized application code to improve the speed and performance of the application

Intern as Application developer at Institutional shareholder services(ISS), Mumbai

January 2022 — July 2022

- Completed doing an application of ecommerce website using vue.js and having Java Rest Service and SQL database in backend.
- Did a project on purchase orders on a daily basis of a company and calculate the costing sheet for each purchase order by data cleaning and numpy

Intern as Academic Trainee at HCL Technologies

February 2021 — July 2021

- During this period, I learned about endpoint protection and its products.
- I even learned about Next Generation Anti Virus (NGAV) solution and learned how it protects the endpoints.

EDUCATION

B.Tech, Cse at, Vellore Institute Of Technology, Vellore, Tamil Nadu

July 2018 — May 2022

CGPA-8.63

PROJECTS

Personal Portfolio Website

Technologies Used: React Js, Bootstrap

A Personal Portfolio website to showcase my skills and projects in one place.

E-voting using Homomorphic encryption

It is an application that will be developed with the prime idea to protect the voting privacy of the people and reveal the number of votes polled for each candidate.
